

Design, Manufacturing, Installation, commissioning and optimization of

Marine Loading Arms

Application:

Marine Loading Arm (MLA) used for safe, easy and economic loading & unloading of oil products to oil tankers and vice versa.

Technical Specification & Services:

- Technical knowledge codification of marine loading arm according to international standards such as OCIMF...
- Pipe size 6", 8", 10", 12"...
- Equipped to quick connect/disconnect couplers (QCDC) and emergency release system (ERS).
- Design and manufacturing of marine Loading arms by considering loading area limitation.
- Design and manufacturing of hydraulic pump unit.
- Design and manufacturing of controlling system.
- Procurement of related explosion proof (EEX"d" grade) of related hydraulic and electrical equipment.
- Design and procurement of relating hydraulic jacks.
- Easy to repair and maintenance.
